OBJECTIVE

- I'm a final-year CSE (AI ML) student with a strong base in Java and data structures. I also have a good grip on OOP concepts and working knowledge of Python, and over the past year I've been building full-stack projects using the MERN stack and SQL. Looking for a Software Developer role where I can apply what I've built in practice, keep learning, and grow with a good team.

EDUCATION

- **B.Tech in Computer Science & Engineering(AI & ML)** (2023-2027)
Lakireddy Bali Reddy College of Engineering (Autonomous), Mylavaram
CGPA: 8.47 (Up to 6th Semester)
- **Intermediate (Class XII)** (2021-2023)
Vit junior college, Narasaraopet
CGPA: 84.6%

SKILLS

- **Programming Languages:** Java, Python, JavaScript.
- **Core CS Fundamentals:** DSA (Data Structures & Algorithms), OOPs (Object-Oriented Programming).
- **Database:** SQL.
- **Web Development (Frontend):** HTML, CSS, JavaScript.
- **Web Development (Full Stack Framework):** MERN (MongoDB, Express.js, React.js, Node.js).
- **Tools / Version Control:** GitHub.

PROJECTS

- **ServiceConnect — Local Service Marketplace Platform**
Built a full-stack MERN platform enabling customers to discover, book, and review verified local service providers with role-based dashboards for customers, providers, and admins.
Implemented JWT authentication, real-time booking updates via Socket.io, an admin panel for provider verification, Google Maps-based location search, Cloudinary image uploads, and automated email/PDF invoice generation.
Tools used: React, Node.js, Express, MongoDB, Socket.io, JWT, Cloudinary
- **Hallucination Detection and Correction in Large Language Models**
Developed an AI system using Retrieval-Augmented Generation (RAG) and Natural Language Inference (NLI) to detect and correct hallucinated responses in Large Language Models.
Integrated LangChain, OpenAI API, Hugging Face, and MongoDB to retrieve verified information and generate reliable AI responses.
Tools used: Python, LangChain, OpenAI API, Hugging Face, MongoDB, RAG
